**Table 1. Sex and Age Profile , 2010 Census**

The male and female populations are shown in the bottom, with their representative percentages. Median ages have no percentage since they are an average.

**Table 8. Employment by industry, 2012 American Community Survey**

The population breakdown by industry separates all those in the working population, 16 years and above, into the industry they currently work in. The Census Bureau uses a consistent methodology to determine the industry classifications into which employees are assigned across the country. Those that are unable to release information due to disclosure complications are due to the low numbers of industries in that sector, and potential for breaching privacy.
